

CONSTRUCTION OF LINK ROAD AT TUITUN, KHAMRANG

Name of Project : *Khamrang to Tuitun Link Road*
Cost of the Project : *Rs.35.00*
Year of funding : *2013-2014*

Brief note of the Project :

Tuitun cluster at Khamrang is a good Agriculture potential area. Many farmers under this area had cultivated Rice and other crops by practicing Shifting cultivation. Many farmers cultivated Banana, Rubber, Oil Palm and other plantation crops. In spite of all these farmers faced problems in transporting materials in and out from the area due to poor road condition.

Seven (7) kms Link Road was constructed under RKVY during 2014 which served as an important infrastructure in transporting of Agriculture inputs (fertilizers, pesticides, weedicides, seeds), helps in easy transportation of farm produce. Farmers in the area can undergo large scale cultivation of Plantation crops like Oil Palm, Rubber and Broom apart from rice and vegetables.
