

Title: Crop Diversification Program, Desar

Background:

Farmer name: Parmar Manubhai Mohanbhai.

Village: Shihora, ta. Desar.

Dist.: Vadodara

Land: 2 ha.

Mo: 8758472144

The farmer was cultivating tobacco. Tobacco is the major crop of that area.

Objectives:

To cultivate wheat in place of tobacco to reduce the harms caused by tobacco.

To increase the productivity of different crops .

To Use organic fertilizers.

To help in sustaining agriculture and reduced environment pollution.

Intervention:

The gram sevak of that village met him and he taught about the new agril technologies. He explained about RKVY CDP scheme and provided seed of wheat in place of tobacco. The farmer used those seeds and some organic manures.

Outcome:

The farmer got enhanced production than before and also produced quality wheat. It helped him improving his financial condition and also protect the land as he used less chemical ferti. And many other farmers of the village also followed him and succeeded.
