

SUCCESS STORY ON IMPROVED JHUM

Name of Farmer :Lalvuana Ngente
Father's Name : Ruaia(L)
Address : Bilkhawthlir
Contact No. : 9862843418
Name of Intervention : Individual Water Harvesting Tank

A. Before the Project (Brief write-up of his economic and production/ farming status including photograph).

Mr. Lalvuana Ngente, a progressive farmer from Bilkhawthlir has a very large cultivable land who took interest in farming and gardening. However he faced problems in irrigating his crops, he did not have structure for storing water for his farm. Before assisted with fund for construction of WHS he solely dependent on rain water for growing paddy and other kharif season crops, but could not go for large cultivation of vegetables.

B. After the Project (Brief write-up on impact of the intervention on his farming/ cultivation practice, production and his economy)

After constructing WHS Mr. Lalvuana could able to store water for cultivating vegetables during rabi season. He increased his cropping areas during rabi and could generate more farm income from growing vegetables. He thankfully reported that he could significantly utilized little amount of water he could store in his tank. In this way his family income increase from his farm produce.
